LEADING ITALIAN LAW FIRM **CBA** JOINS **ISFIN** TO BE LEADER ON EMERGING MARKETS.

9/02/2021

CBA and **IsFin**, announce a synergy to boost the foreign investment market in Italy.

Italy is becoming one of the entry gates for foreign investors in Europe. Thanks to its strong industrial background and excellence in tourism, Italy offers very interesting opportunities for investors and corporations willing to be present in Europe.

Prof. **Laurent Marlière**, CEO of IsFin says: "Italy is one of the European countries which has been most affected by the COVID-19 crisis. This provides a lot of opportunities for smart investors as attractive assets are available for sale, predominantly in the sectors of hospitality and hotels, mechanics, ICT, healthcare, energy, fashion and luxury. From a distressed assets opportunity perspective it is worth mentioning that the NPL and UTP markets still makes Italy a country to watch. In addition, Italy remains a sound investment for Asian and Middle Eastern investors in the agrobusiness sector."

Angelo Bonissoni, Managing Partner of CBA says "CBA is not only reputed for its strong legal practice, it has a very solid tax advisory practice. We are very happy to join IsFin and we are confident that foreign investors and entities may benefit from our sophisticated legal and tax services". Bonissoni who is member of the tax committees at AIFI (Italian Association of Private Equity, Venture Capital, Private Debt) and Invest Europe (European association of private

capital providers) says: “Italy is a very challenging and complex market for investors outside of the European Union, but it also offers unique opportunities”.

Francesco Dialti, Partner of CBA in charge of Banking&Finance adds: “Our specific understanding of the legal and tax environment combined with the unique expertise of IsFin in the emerging markets of Asia, the Middle East and Russia will provide a unique one stop shop to make a difference in this market.”
